

# Centennial College

## **COURSE COMP125**

### **ASSIGNMENT #2 – 10 Marks**

**Due Date: Please refer to eCentennial**

Create an HTML document called **YourName\_Assignment2.html**.

- In the HTML page, add a brief introduction about yourself. (1 Mark)
- The page should have a courses section, which will list all the courses you are studying in this semester. (1 Mark)
- In the 'Courses section' add a button with the text 'Show Courses From Previous Semesters'. When this button is clicked you must create elements in JavaScript to display the courses you studied previously and append them as children to the courses section. (3 Marks)
- The page should have 'Mission section' which shows your career mission. To this section, Add a button called 'Change text color', when this button is clicked change the color of the mission text to red, in Javascript. (2 Marks)
- Add a section called skills and mention the following skills in a list – 1) HTML 2) CSS 3) JavaScript. In this section, add a button with the text "Add React to the Skillset". When user clicks on this button, react must be added to your skills, above html. (2 Marks)
- When the page is loaded the Windows prompt should ask for the name of the user and display a welcome message accordingly. (1 Mark).

### **Submission Rules:**

- Submit your HTML, CSS, JS files as a **.zip file** to eCentennial.
- Also please submit, proof of work as a video. Just do screen recording and explain your code and output, in a video. The video duration can be between 2 – 3min. Links to youtube will also be accepted. The assignment will not be accepted without this proof of work. Think of this as a practice session for the code-walkthrough that you might be doing in a job interview.  
If you are unable to do this video due to any health condition, please send an email to the professor.
